

Mobile yard ramp

Type STAR
Type STARP

ΚΙΝΗΤΗ ΡΑΜΠΑ ΦΟΡΤΟΕΚΦΟΡΤΩΣΗΣ

The mobile yard ramps are part of STANDOOR HELLAS wide product range. They offer the possibility of loading and unloading trucks, containers or wagons directly from yard level. The whole maneuvering and loading process can be managed by just one person.

The ramps are made of robust welded steel and the whole driving range consists of stable grids that are optimally dimensioned and suited for heavy loads. For accident prevention the ramp is equipped with lateral protection bars on the left and right side.

The mobile yard ramp is available in its standard version (type STAR) or with an additional horizontal platform (type STARP). For loading and unloading of high loads the STARP version is recommended with forklift truck safely entering the lorry via the horizontal part of the ramp.

	Type STAR	Type STARP
Overall width for load capacity of 7t	2340mm	2360mm
Overall width for load capacity of 10t	-	2380mm
Height adjustment range	850 - 1750mm	
Overall length	9500mm	11500mm

Technical details

- Robust steel
- Optimal manoeuvrability even for small spaces
- Heavy-duty wheels
- Anti-slip and open hot-dip galvanized grids
- Load capacities: 7t and 10t
- Infinitely variable height adjustment of the ramp by means of a manual hydraulics pump
- High-stability safety chain for fixing the mobile yard ramp to the truck, container or wagon
- Floating position for optimal adaption of the vehicles during the loading or unloading process
- High-quality corrosion protection (available in RAL colours or hot-dip galvanised version)
- Movable by means of forklift truck
- Load hook for forklift truck (for fast moving of the yard ramp)
